

Ask your Doctor

Only your doctor can determine if iSee lenses are right for you or your child. Ask if you or your child is a candidate for iSee corneal reshaping therapy. If so, you may experience the joy of clear vision without day-time contacts or glasses in as little as 1 to 2 weeks.*

Will iSee lenses help stop my child's vision from getting worse?

Corneal reshaping has been shown to arrest or slow the progression of myopia when compared to children wearing glasses.

Do all Eye Care practitioners provide corneal reshaping therapy?

Not all doctors are certified in fitting corneal reshaping contact lenses. However, with the recent advancements in contact lens materials and improved diagnostic equipment, ortho-k vision correction is now offered by more doctors than ever. iSee lenses are a great option to correct, control and treat nearsighted and astigmatic patients.

Does corneal reshaping therapy qualify for Reimbursement Accounts?

Yes, corneal reshaping does qualify for most employer sponsored Health Care Reimbursement Accounts.

FAQ

What is Ortho-K, corneal reshaping?

There are numerous popular terms for corneal reshaping techniques using contact lenses. You may have heard the terms: orthokeratology (ortho-k), overnight vision correction, vision shaping treatment, or corneal reshaping therapy - all of these refer to the same vision correction medical treatment using contact lenses to reduce myopia.

Is corneal reshaping therapy safe?

Yes, no known adverse events have been reported to the FDA. Additionally, a key safety benefit of iSee corneal reshaping is that if you stop wearing iSee lenses your vision will return to its previous vision levels.

For the first time in my life I am able to enjoy the activities I love without worrying about losing a lens. iSee lenses have literally changed my life.

The clear
alternative
to surgery
life without daytime
contact lenses or glasses

iSee™ Reshaping the Way the World Sees

Finally, an alternative to glasses and daytime contact lenses without surgery.

Introducing the therapeutic iSee contact lens. iSee lenses are FDA approved custom made contact lenses specifically designed to gently reshape the cornea while you sleep. You simply wear the iSee lenses while you sleep and take them out in the morning to enjoy clear vision all day long.

iSee corneal reshaping lenses to help control myopia

Myopia, also known as nearsightedness, is a condition in which your near vision is clear but distance vision is blurry. This condition is often diagnosed at an early age and progressively worsens until late adolescence.

Several studies support the possibility that corneal reshaping lenses help slow and sometimes even stop the advancement of nearsightedness.

By wearing iSee lenses to gently reshape your corneas, you or your child now have an alternative to glasses or daytime contact lenses that may correct your myopia and prevent its progression.

Why parents love iSee lenses

iSee lenses give you control over your child's future vision by offering the chance to slow and possibly prevent the progression of myopia in their pre-teen and teenager's eyes.

iSee™ life.

Don't let traditional glasses or contact lenses hinder you from experiencing life to the fullest. Whether you or someone you care for is involved in sports, water or outdoor activities - iSee corneal reshaping lenses are perfect for the active lifestyles of today's kids, teens, and adults.

How iSee lenses work

iSee lenses are designed to gently reshape the first few microns of the cornea while you sleep. Once the lenses are removed in the morning, the slight change in the curvature of the corneal surface results in clear vision during waking hours thus reducing the dependence on daytime contact lenses or glasses.

The best part is that iSee corneal reshaping is safe, non-surgical, non-invasive and reversible. Results may vary so ask your doctor if iSee lenses are right for you or your child.

Do you have dry eyes or allergies?

iSee lenses are also an excellent choice for patients who suffer from dry eyes and allergies.
